

Sand Pro M-Series

Sanding Tables, Sanding Booths, & Inspection Lighting

- Self-contained
- Portable

**You can't get away from the sanding,
but you can get away from the dust.**

- Easy Filter Servicing
- Great Air Velocity

The Sand Pro M-series of downdraft sanding tables provides an economical way to get away from sanding dust by collecting it directly at the source. These machines are self-contained sanding stations that are portable, quiet, and powerful. All machines come on 5" casters that lock both ways, giving the user an easily movable machine that also makes for a solid work station. The unique grid system top allows for jigs and fixtures to be moved around to add value and versatility to the Sand Pro. The Sand Pro M-series is a highly practical solution for hand sanding applications.

FYI

~~K~~ There is no need to rob valuable C.F.M. from your central vacuum system or conditioned air from your shop. Machine remains truly portable with no interference from a long vacuum hose.

~~K~~ Uses high quality 2" deep pleated filters and comes with a 1/2" netted prefilter for collecting larger particles. Change filters in 30 seconds without bending over.

~~K~~ Top is 1/4" ABS plastic with a rubberized coating providing a mar-free, moisture resistant, top with good friction. It is supported by a 2"x3/4" aluminum tube.

Model	Length	Width	Height	CFM	HP	Price	Ship Weight
