

Sand Pro M-Series

Sanding Tables, Sanding Booths, & Inspection Lighting

- Self-contained
- Portable

You can't get away from the sanding, but you can get away from the dust.

- Easy Filter Servicing
- Great Air Velocity

The Sand Pro M-series of downdraft sanding tables provides an economical way to solve your fine sanding dust problems by collecting directly at the source. Machines are self-contained, portable, quiet, and powerful. Unique grid system top allows for jigs and fixtures to be moved around for added value and versatility. Models available in 5 sizes & 2 heights. Sand Pro M-series Sanding Tables are a highly practical solution for solving your fine sanding dust problems.

M7236

M4831

FYI

~~K~~ No need to rob valuable C.F.M. from your central vacuum" system or conditioned air from your shop. Machine remains truly" portable with no interference from long vacuum hose.

~~KK~~ Uses high quality 2" deep pleated filters and comes with a 1/2" netted prefilter for collecting larger particles. Change filters in 30"seconds without bending over.

~~KKK~~ Top is 1/4" ABS plastic with a rubberized coating providing a mar"free, moisture resistant, top with good friction. It is supported by" a 2"x3/4" aluminum tube.

Model	Length	Width	Height	CFM	HP	Ship Weight
